Synopsis: In a future where ecological disasters have ravaged the agricultural industry, Layla and her husband Jack live in isolation on their struggling cattle farm. While Layla longs for her son who is away at boarding school, Jack experiments with biotechnology that he hopes will save his family from financial ruin. But as unsettling occurrences start to plague the property, their once-loving relationship begins to unravel. Developed through the renowned Sundance Screenwriters Lab, IN VITRO presents a chillingly believable future that explores the dynamics of possession and manipulation against a stark Australian backdrop.
